Education

Indian Institute of Information Technology

Bachelor of Engineering in Computer Science

August 2022 – July 2026

Kota, Rajasthan

Emmanuel Mission Sr. Sec. School

Class XII CBSE (Science Stream)

March 2021 – July 2022

Beawar, Rajasthan

Relevant Coursework

- Data Structures
- Software Engineering
- Database Management
- Operating Systems
- Algorithms Analysis
- Computer Networks
- Artificial Intelligence
- Cloud Computing

Experience

XelronAI

SDE Intern

March 2026 – Present

Remote

- Developing and optimizing scalable backend and frontend features while working closely with the engineering team to build production-ready solutions.
- Collaborating with developers, reviewers, and cross-functional teams to deliver high-quality tasks, manage workflows, and ensure efficient project execution.
- Improving system performance and automation workflows by debugging issues, refining implementations, and ensuring reliable deployment of features.

Projects

Neurica | Medical Appointment Management System

- Engineered a comprehensive healthcare appointment platform, streamlining patient-doctor interactions by 40% through a responsive and scalable MERN Stack architecture.
- Integrated a secure payment gateway, reducing booking drop-offs by 25% through seamless and reliable transaction processing with the Razorpay API.
- Optimized clinic operational workflows by over 60% by implementing a dynamic Admin and Doctor Dashboard for real-time appointment management and profile verification.

LernFlow | Full-Stack Learning Management Platform

- Built a full-stack LMS platform using React, Node.js, Express, MongoDB, and JWT-based authentication for secure user access.
- Implemented role-based features with protected routes, enabling students to enroll in courses and instructors to manage course content and dashboards.
- Developed and integrated RESTful APIs for users, courses, and enrollments, with a modular architecture and deployment-ready frontend/backend setup.

Code-Cast | Real-Time Collaborative Code Editor

- Build a full-stack real-time code collaboration platform using React, Node.js, Express, Socket.IO, and CodeMirror.
- Enabled multi-user room-based editing with live code syncing, username-based participation, and room sharing features.
- Added an integrated compiler panel, responsive UI, and deployed frontend/backend for production use on Vercel and Render.

Technical Skills

Languages: Python, C, C++, JavaScript, SQL

MERN Stack: MongoDB, Express.js, React.js, Node.js

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Languages: JavaScript (ES6+), TypeScript, Python, C++, SQL, C

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, OAuth2

Version Control: Git, GitHub, Postman, VS Code, Docker, Render, Vercel

Others

Self-Initiated Projects: Developed various self-initiated products, including Automation tools, AI calling, Exam preparation apps, AI marketplace, Event management, Medical applications, Application management and Travel apps.

Leadership Experience: Coordinated and led multiple clubs and events, resulting in a greater participation rate and the supervision of multi-functional project teams.
